

Proyecto final: Desarrollo Full Stack JavaScript

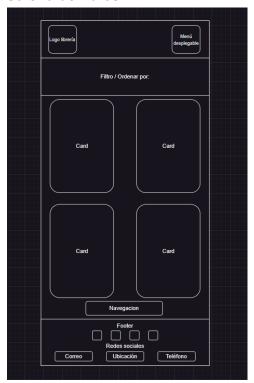

INTEGRANTES:

- Rodrigo González
- Leslie Reyes
- Matias Cuadros

- 1. Diseño de la interfaz gráfica:
 - Landing page:

- Galería de libros:

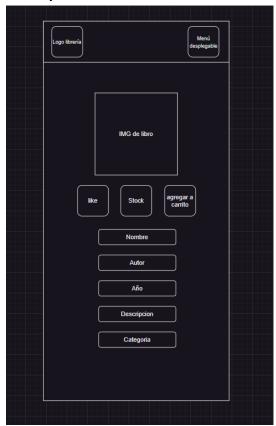

- Login:

- Registro:

- Descripción libro:

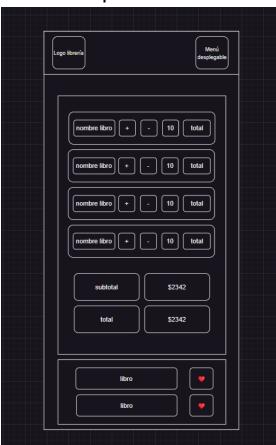

- Favoritos:

- Editar perfil:

- Carrito de compras:

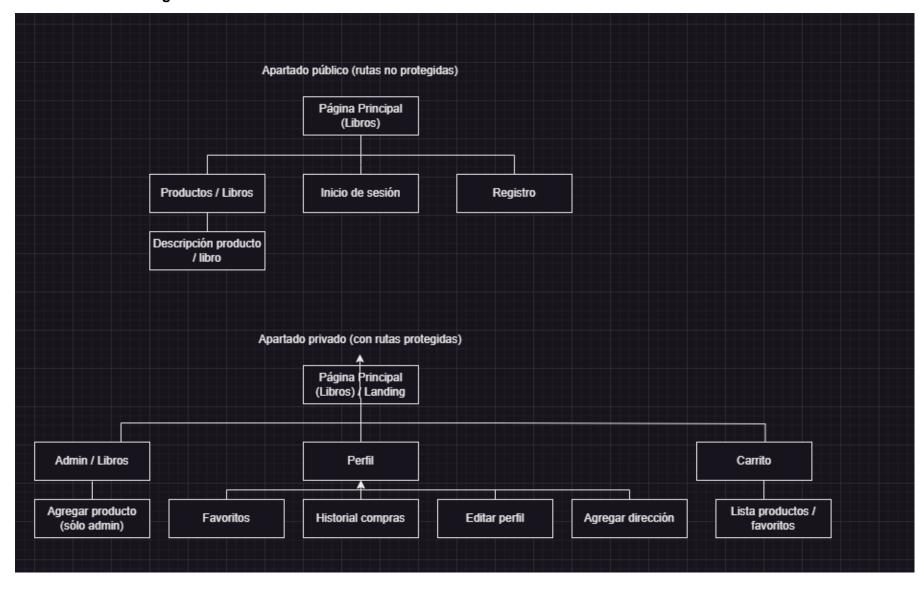

-Agregar libro: Nueva publicación

-Agrega dirección al perfil

2. Definición de la navegación

3. Listado de dependencias a utilizar en el proyecto

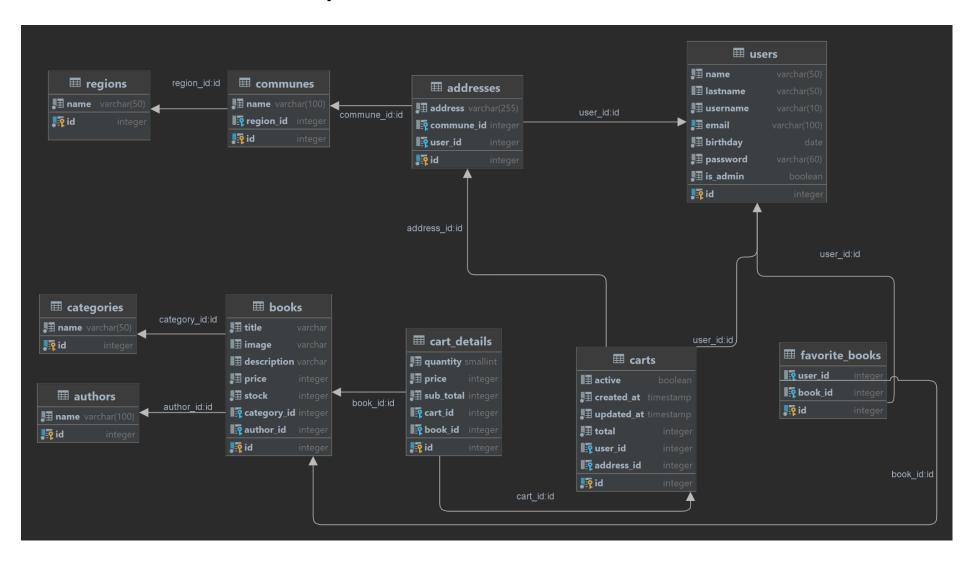

Dependencias Frontend

```
"dependencies": {
    "bootstrap": "^5.2.3",
    "react": "^18.2.0",
    "formik": "^2.4.2",
    "react-dom": "^18.2.0",
    "react-router-dom": "^6.14.1",
    "react-icons": "^4.10.1",
    "react-multi-carousel": "^2.8.4",
    "react-toastify": "^9.1.3",
    "sass": "^1.63.6",
    "material-ui": "^5.13.7"
},
    "devDependencies": {
        "nodemon": "^2.0.22"
}
```

Dependencias Backend

```
"dependencies": {
    "cors": "^2.8.5",
    "dotenv": "^16.1.3",
    "express": "^4.18.2",
    "pg": "^8.11.0",
    "pg-format": "^1.0.4",
    "jest": "^28.1.3",
    "supertest": "^6.2.4",
    "morgan": "^1.10.0"
},
    "devDependencies": {
        "nodemon": "^2.0.22"
}
```

4. Diseño de tablas de la base de datos y sus relaciones

5. Diseño de contrato de datos de API REST

```
"Registro de usuario"
POST /api/v1/register
request:
payload: {
    name: String;
    email: String;
    username: String;
    dateOfBirth: String;
    password: String
};
response: {
    ok: boolean;
    message: string
}
```

```
"Inicio de sesión de usuario"
POST /api/v1/login
request:
payload: {
    login: String;
    password: String
};
response: {
    ok: boolean;
    token: string
}
```

```
"Edición de usuario"
PUT /api/v1/user
request:
headers: {
    Authorization: Bearer token;
};
payload: {
    name: String;
    username: String;
    password: String
};
response: {
    ok: boolean;
    message: string
}
```

```
"Agregar dirección de usuario"
GET/api/v1/region //tabla específica
request:
response: {
   ok: boolean;
   region: []
}
GET/api/v1/commune //tabla específica
request:
response: {
   ok: boolean;
   commune: []
}
POST /api/v1/user/address
request:
headers: {
   Authorization: Bearer_token
};
body: {
    address: string;
    idCommune: Number
};
response: {
   ok: boolean;
    message: string
```

```
"Obtener el detalle de un libro (producto) específico:"
GET /api/v1/books/{bookId}
request:
params: {
    id: Number
};
response: {
    ok: boolean;
    book: {}
}
```

```
"Agregar un nuevo libro (producto)"
POST /api/v1/books
request:
headers: {
    Authorization: Bearer token;
};
payload: {
   title: String;
   image: String;
   description: String;
   price: number;
    stock: number;
    author: Number; //corresponde al id de la categoría/autor
    category: Number;
};
response: {
   ok: boolean;
   message: string
```

```
"Actualizar la información de un libro (producto)"
PUT /api/v1/books/{bookId}
request:
headers: {
    Authorization: Bearer token;
};
payload: {
    title: String;
    image: String;
    description: String;
    price: number;
    stock: number;
    author: Number; //corresponde al id de la categoría/autor
    category: Number;
};
response: {
   ok: boolean;
    message: string
```

```
"Agregar un libro a la lista de favoritos de un usuario"
POST /api/v1/user/favorites
request:
headers: {
    Authorization: Bearer_token
};
body: {
    book: Number; //id
};
response: {
    ok: boolean;
    message: string
}
```

```
"Obtener favoritos de un usuario"
GET /api/v1/user/favorites
request:
headers: {
    Authorization: Bearer_token
};
response: {
    books: []
}
```

```
"Carro actual, sin finalizar"
GET /api/v1/user/cart
request:
headers: {
    Authorization: Bearer_token
};
response: {
    ok: boolean;
    cart_detail: []
}

"Finalizar compra, simular proceso de pago"
POST / api/v1/user/purchase
```

```
"Finalizar compra, simular proceso de pago"
POST / api/v1/user/purchase
request:
headers: {
    Authorization: Bearer_token
};
body: {
    idAddress: Number
};
response: {
    ok: boolean;
    message: string
}
```

```
"Agregar el detalle de la compra realizada"
POST /api/v1/user/cartdetail
request:
headers: {
    Authorization: Bearer_token
};
payload: {
    book_id: number;
    quantity: number
};
response: {
    ok: boolean;
    message: string
}
```

```
"Ver histórico de compras"
GET /api/v1/user/allcarts
request:
headers: {
    Authorization: Bearer_token
};
response: {
    ok: boolean;
    carts: []
}
```

```
"Obtener el detalle de una compra en específico"
GET /api/v1/user/cart/:id
request:
headers: {
    Authorization: Bearer_token
};
params: {
    id: Number
};
response: {
    ok: boolean;
    cart: {}
    cart_detail: []
}
```
